MAYUR - BACKEND & FULL-STACK DEVELOPER

Email: mayur.dev@example.com | GitHub: github.com/mayur-64 | Location: Remote

---

SUMMARY

Passionate software engineer focused on building performant backend architectures, scalable web applications, and streamlined automation workflows. Experienced with Python, Linux systems, modern JavaScript, and clean API design.

TECHNICAL SKILLS

* Languages: Python, JavaScript (ES6+), SQL, Bash / Shell, HTML5 & Modern CSS
* Backend: FastAPI, Starlette, AsyncIO, RESTful APIs, Concurrency, Microservices
* Systems & DevOps: Linux/POSIX, Git, GitHub Actions, ARM64 Kryo, Process Management
* Quality: WCAG AA Accessibility, Lighthouse 100/100, Performance Profiling

FEATURED PROJECTS

* Project Monitor PaaS - Personal PaaS control plane and health monitoring dashboard.
  Stack: Python, FastAPI, Linux, REST API, WebSocket.
* PocketGallery - High-performance photo and video indexing engine.
  Stack: Python, FastAPI, SQLite WAL, Vanilla JS, FFmpeg.
* Edge Task Orchestrator - Async micro-task scheduler for ARM64 edge systems.
  Stack: Python, AsyncIO, Multi-Processing.

EXPERIENCE

* Senior Backend & Systems Developer | Tech Horizon Systems (2023 - Present)
  - Architected high-throughput API microservices handling 12M+ daily requests.
  - Optimized SQLite WAL concurrency and query plans, cutting p95 latency by 45%.
  - Streamlined automated CI/CD pipelines, slashing build times from 35m to 6m.

* Software Engineer | Apex Cloud Solutions (2021 - 2023)
  - Developed full-stack web applications and internal telemetry dashboards.
  - Integrated real-time edge telemetry and asynchronous queue workers.

EDUCATION & CERTIFICATIONS

* B.S. in Computer Science - University of Technology (Honors Graduate)
* Linux Professional Institute Certification (LPIC-1) | AWS Certified Solutions Architect
